

Quick Start: Your First 7 Days

Senior Transition Blueprint — Module 0

Don't try to do everything at once. This checklist maps out your first week in small, manageable steps. Each task takes 20-30 minutes. Check them off as you go.

DAYS 1-2: FIGURE OUT WHERE YOU ARE

- Complete Module 1 — identify your transition stage and timeline
- Fill out the Starting Point Quick Assessment (Module 1 toolkit)
- Fill out the Timeline Reality Check (Module 1 toolkit)
- Decide your Blueprint path: Linear, Urgent, or Early Planning

DAYS 3-4: ADDRESS SAFETY FIRST

- Walk through the home — identify loose rugs, poor lighting, cluttered walkways
- Fix anything that could cause a fall TODAY (30 minutes, no module needed)
- If senior lives alone: download SeniorSafe at app.seniorsafeapp.com
- Set up the daily I'm Okay check-in so family knows senior is safe

DAYS 5-6: GET THE FAMILY ON THE SAME PAGE

- Send the Family Sharing Letter to siblings and involved family members
- Read Module 13 overview on family communication (prevents blowups later)
- Start a shared group text or note with family to keep everyone informed
- Upload completed tools to SeniorSafe vault so family can access them

DAY 7: BUILD YOUR RHYTHM

- Schedule recurring Blueprint time (even 30 min twice a week adds up fast)
 - Begin Module 2 (Decluttering) if on Linear or Early Planning path
 - Begin Module 5 (Safety & Repairs) if on Urgent path
 - Celebrate — you've made more progress in 7 days than most families make in 6 months
-

YOUR BLUEPRINT PATH:

Linear (most families): Modules in order, 2-3 per month. Comprehensive preparation.

Urgent (crisis mode): Skip to Modules 5, 9, 10. Safety and home sale first. Come back to earlier modules later.

Early Planning (1-5+ years): Modules 1-4 at a relaxed pace. Gradual decluttering and financial prep.
