

LTC Insurance Decision Guide

Module 15 — Is It Right for You?

Answer these questions to determine if LTC insurance makes sense for your situation.

Age: _____

Best window: 50-65. Over 70: likely too expensive.

Current health: ☐ Excellent ☐ Good ☐ Fair ☐ Poor

Fair/Poor may disqualify you from coverage.

Total assets (excluding home): \$_____

Under \$200K: Medicaid may be better path. Over \$500K: LTC protects significant assets.

Can you afford \$3,000-\$8,000/year in premiums? ☐ Yes ☐ No

Premiums should be <7% of retirement income.

Family history of long-term care needs? ☐ Yes ☐ No

Family history increases your likelihood of needing care.

Do you have a spouse who would be financially impacted? ☐ Yes ☐ No

LTC protects the healthy spouse's assets.

RECOMMENDATION GUIDE

LTC Insurance LIKELY makes sense if: Age 50-65, good health, assets >\$200K, can afford premiums, family history of care needs.

LTC Insurance LIKELY does NOT make sense if: Over 70, poor health, assets <\$100K (Medicaid path), can't afford premiums, or assets >\$2M (self-fund).

ALTERNATIVE STRATEGIES (if LTC not viable)

- ☐ Medicaid planning with elder law attorney (5+ years ahead)
- ☐ Self-funding: earmark \$_____ for future care needs
- ☐ Family agreement on care provision and financial contributions
- ☐ Home equity as care funding source (Module 9)
